EDUCATION

Indira Gandhi Delhi Technical University for Women, Delhi

BTech in Computer Science Engineering with specialization in Artificial Intelligence, CGPA - 8.0

Government Sarvodaya Vidyalaya New Multan Nagar, Delhi

Class XII - 79%

Dharam Deep Secondary Public School, Delhi

Class X - 94%

WORK EXPERIENCE

AI Developer Intern (AI-DS Department, IGDTUW)

June 2025 - July 2025

- Developed an AI model for network intrusion detection using machine learning on security data, achieving 98% accuracy in identifying threats.
- Built and integrated a full-stack React and Flask dashboard to process data and visualize potential security risks in real-time.

Associate Management Director (MentorMenti)

Feb 2024 - Dec 2024

- Directed a 15-member team in planning and delivering 10+ cloud technology workshops using Azure, directly training 200+ attendees in key DevOps and infrastructure skills.
- Secured sponsorships from 2 startups, boosting event engagement by 40% through strategic partnerships.

Founder, Women in Tech Community (Young Leaders Foundation)

Oct 2023 - Dec 2024

- Grew a tech community to 100+ members by organizing coding bootcamps and technical workshops.
- Secured a speaking invitation to guide 50+ students at MD Memorial Senior Secondary School.

SKILLS

Languages - C++ (Proficient, STL), SQL (Proficient), Python (Familiar)

Networking - TCP/IP Stack, Network Fundamentals

Cloud/DevOps - Azure, Agile Methodologies

Data & Visualization - Power BI, Tableau, Excel

PROJECTS

Project 1 High-Performance Network Data Analyzer (C++, Azure ML, Multi-threading)

- Engineered a low-latency C++ application using multi-threading to process and analyze high-volume data streams, simulating network traffic patterns.
- Integrated an Azure ML model for real-time anomaly and intrusion detection, improving accuracy and reducing false positives by 30

Project 2 Cross-Platform Assessment Tool (C++, React)

- Developed a low-latency C++ backend to support 100+ concurrent users, focusing on efficient resource handling and network communication.
- Implemented custom memory management to ensure stable performance and reliability under sustained load.

Project 3 Thrombosis Detection Literature Review (Academic Research)

- Analyzed 10+ papers on AI for real-time diagnostics, focusing on model latency and accuracy trade-offs.
- Identified research gaps in deploying ML for real-time, time-sensitive applications.

ACHIEVEMENTS

- Solved 250+ DSA problems on LeetCode; achieved Knight rating
- JEE Mains 94.63 percentile
- National Hindi Olympiad Winner
